

Workspace ONE Deployment

Deployment of the Workspace ONE Unified Endpoint Management (UEM) and Workspace ONE Access environment. This enables the customer to simply and securely deliver and manage any app on any device. Workspace ONE integrates access control, application management and multi-platform endpoint management into a single platform.

Why/Outcome

This service offering includes the design, integration and knowledge transfer to manage corporate mobile devices, provide secure access to enterprise systems, push configuration of corporate apps and utilize modern management for Windows 10 devices. Furthermore, we will integrate a self-service application catalog using VMware Workspace One Access.

Products included in this offering

- VMware Workspace ONE UEM
- VMware Workspace ONE Access

High level project timeline

- 2 Weeks

Challenges can be addressed

- Manage all mobile devices
- Enable modern management

Onsite and remote operations

- Kick-off meeting for the upcoming deployment
- Integrate MDM foundation with directory services and certificate authorities
- Leverage Workspace ONE UEM to manage Windows 10 compliance
- Leverage Workspace ONE UEM to manage Windows 10 users and devices
- Leverage mobile device management for application tunneling
- Leverage mobile device management for mobile app configuration
- Leverage mobile device management for secure mobile content management
- Leverage mobile device management for secure mobile email management
- Leverage mobile device management to manage Android devices
- Leverage mobile device management to manage iOS devices
- Leverage app catalog to access virtual desktops and published apps
- Get started with a unified app catalog
- Leverage identity aggregation for a self-service catalog
- Provide two-factor authentication to the app catalog

Prerequisites:

the following components need to be in place:

- Directory Services Service Accounts
- Firewall Administrator for Firewall Rules
- Capability to integrate virtual Appliances (OVA)
- For remote tasks and support, a proper remote access, for example via VPN or VDI, is required
- Network configuration based on comdivision's network guidelines

Proper access mechanisms for all the components listed above.

“The comdivision group – founded in 1996 – provides outcome-oriented IT strategy consulting and implementation support in DACH and the USA. The comdivision group was the first partner in EMEA to achieve all 5 VMware Master Service Competencies and was recognized as a Professional Services Partner in 2019. Most of the architecture and consulting team – including two VMware Certified Design Experts (VCDX) – are also VMware Certified Instructors (VCI), so you have the peace of mind to be taken along through each step of the way, preparing you for successful Day 2 operations. If you need assistance beyond that, ask for our cd:knowledge product, an expert-on-demand service that gives you up to 24/7 access to our specialists.”
