

NSX-T Kickstart Workshop

VMware NSX is the software defined networking platform allowing you not only to move standard network services into the software stack, but also build the necessary platform to be multi/hybrid-cloud ready. It is also the key building block to build a modern state-of-the-art secure network infrastructure. Granular protection for your apps via micro-segmentation down to the individual workload. Create context-aware security policies per workload to defend against lateral threats within your environment. comdivision will help you understand the platform, potential use cases and apply them to your needs.

Why/Outcome

The capabilities of NSX can be overwhelming. Identifying where to start and how to leverage the full potential of NSX is a clear target of this engagement. One of our network and solutions architects will help you understand the NSX potential and work with you on an individual strategy how to apply NSX in your infrastructure.

We will help you with the potential use cases of NSX in your organization specifically and discuss potential implementation approaches and provide you with an actionable plan how to design, implement and operate NSX that matches your needs.

Products aligned with this offering

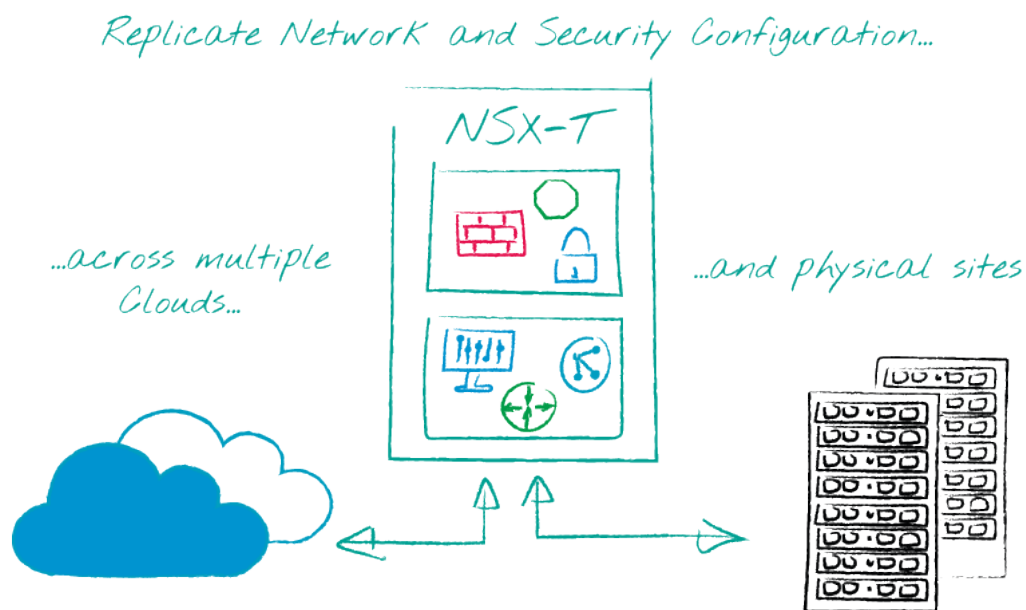

- VMware vSphere
- VMware NSX-T/NSX-V

High level project timeline

- 2-4 weeks

High level services provided

- NSX overview.
- High level design.
- Analysis of potential use cases and priorities.
- Actionable plan to design, implement and operate.

Project timeline

After an initial kick-off workshop, the comdivision architect will provide an overview of the different use cases for NSX and help you identify how they apply to your infrastructure. In a next step a design/implementation/operation plan (high-level) will be developed together.

Additional options provided

- 3rd party integrations for Firewall, IDS/IPS, Anti-Virus, Security
- Integration of public cloud systems
- Design and deploy workshop
- Operations training

“The comdivision group – founded in 1996 – provides outcome-oriented IT strategy consulting and implementation support in DACH and the USA. The comdivision group was the first partner in EMEA to achieve all 5 VMware Master Service Competencies and was recognized as a Professional Services Partner in 2019. Most of the architecture and consulting team – including two VMware Certified Design Experts (VCDX) – are also VMware Certified Instructors (VCI), so you have the peace of mind to be taken along through each step of the way, preparing you for successful Day 2 operations. If you need assistance beyond that, ask for our cd:knowledge product, an expert-on-demand service that gives you up to 24/7 access to our specialist
